## Custom Wood Chairs & Stools

- Wood**  
*Species:* 100% Solid European Beech Hardwood
- Construction**  
*Joints:* Mortise and tenon. Glued with high solids glue and reinforced with 18 gauge nails, corner blocks and low root woodscrews.
- Stain Colors**  
A wide range of standard stain colors is available as well as custom color matching. (A surcharge will apply to custom colors.)
- Barstools**  
Standard kickplates on barstools are brass. Chrome kickplates available at no additional charge. Optional Seat Heights: 24" - 31".
- 9-Step Finishing Process**
1. The bare wood of the assembled chair is thoroughly sanded using 120 grit paper.
  2. One coat of stain is sprayed onto the entire chair including the underside of the seat.
  3. The stain is hand wiped to ensure an even color and maximum penetration into the wood.
  4. The chair is inspected and any necessary adjustments made.
  5. One coat of a catalyzed sealer is sprayed onto all wood parts to completely seal the wood including the underside of the seat.
  6. Once dry, the sealer is sanded using 320 grit paper.
  7. A final sanding is done using Scotch Brite pads to remove any sanding marks.
  8. A catalyzed lacquer is sprayed on. This lacquer is very durable and will stand up in a commercial environment.
  9. A final inspection is performed prior to packaging to ensure a high level of quality control.
- Note:* Specifications are subject to change without notice.

### Dimensions

H516A Arm Chair  
H516A Height 40"
