Custom Multi-Purpose Chair

Chair Construction

Frame: Made from 18 Gauge tubular steel utilizing steel supports and painted with a durable powder coat paint finish giving you an attractive yet versatile chair. The frame has a 25 year warranty against manufacturing defects.

T-Nut and Bolt Assembly: The back and seat are attached to the frame by screwing bolts into T-Nuts (encased in the plywood). Backs and seats can be quickly removed and reattached. Screw to wood assembly can cause detachment through time, the threads stripping loose from the wood grains due to movement.

Protect your fabric

Fabric Protection is as vital as the comfort and functionality of the chair. By protecting the fabric from food and beverage stains, the fabric is easier to clean which is essential for keeping up the appearance of the chairs.

The DuPont™ Teflon® is applied to the fabric creating a barrier of protection though still allowing the fabric to breathe and feel natural. It keeps most spills from embedding into the fibers of the fabric allowing you to clean up the spill before it becomes a stain.

**Does not protect against candle wax.*

Fabric Protection can be applied in warehouse for In-stock Chairs.

Designer COM Fabrics

MBI's offers an extensive collection designer fabrics to suit all applications.

TIME-Additional lead times may apply for COM Fabrics.

Fabric Barrier Protection

Fabric protection can be applied to all standard and custom fabrics, creating a barrier of protection while still allowing the fabric to breathe and feel natural. It keeps most spills from embedding into the fibers of the fabric allowing you to clean up the spill before it becomes a stain.

Adjustable Interlocks

Adjustable interlocks slide out of sight under the seat when not in use.
