The A2250 folding chair uses a annealed tubular steel to make one of the strongest and lightest folding chair in the industry.

Seat and back are polypropylene for durability and easy maintenance.

Stacking 50 high on a transport cart makes for an excellent space saving chair.

- Maintenance free rivets attach seat and back to frame.
- Overlapping back protects the frame.
- Slide track is deburred and rivets are rolled smooth to eliminate sharp edges.
- Double riveted rear cross-braces 3/8" from floor are easy to set up.
- Does not interstack with competitors chairs.
