H501W

H501AW

H501V

The H501 side rails are extra thick to support the weight of people climbing up and leaning onto the chair next to them.

The back slats are raised from the seat to allow for easy cleaning.

The wood seats are sculpted at the factory to ensure a comfortable sitting position.

Stain Colors Shown Above
6 of 14 Colors Shown
Not Shown 14 Wood Stains

H501 Series *Custom Wood Chairs & Stools*

Wood

Species: 100% Solid European Beech Hardwood

Construction

Joints: Mortise and Tenon. Glued with high solids glue and reinforced with 18 gauge nails, corner blocks and low root woodscrews.

Stain Colors

A wide range of standard stain colors is available as well as custom color matching. (A surcharge will apply to custom colors.)

Barstools

Standard kickplates on barstools are brass. Chrome kickplates available at no additional charge. Optional Seat Heights: 24" - 30".

9-Step Finishing Process

1. The bare wood of the assembled chair is thoroughly sanded using 120 grit paper.
2. One coat of stain is sprayed onto the entire chair including the underside of the seat.
3. The stain is hand wiped to ensure an even color and maximum penetration into the wood.
4. The chair is inspected and any necessary adjustments made.
5. One coat of a catalyzed sealer is sprayed onto all wood parts to completely seal the wood including the underside of the seat.
6. Once dry, the sealer is sanded using 320 grit paper.
7. A final sanding is done using Scotch Brite pads to remove any sanding marks.
8. A catalyzed lacquer is sprayed on. This lacquer is very durable and will stand up in a commercial environment.
9. A final inspection is performed prior to packaging to ensure a high level of quality control.

Note: Specifications are subject to change without notice.
